IUPAC

The following Provisional Recommendation is now available on the IUPAC web site:

www.iupac.org/reports/provisional/abstract10/slomkowski_301110.html

Unless you ask us for a printed copy, this document will not be sent to you by mail.

The public comment period for this Provisional Recommendation will end 30 November 2010.

To facilitate the dissemination of this document and all other provisional recommendations, you may refer to the IUPAC web site

www.iupac.org/reports/provisional/index.html

the abstracts and full texts (as pdf files) are accessible from this page.

2011 IUPAC Prize for Young Chemists

The IUPAC Prize for Young Chemists has been established to encourage outstanding young research scientists at the beginning of their careers. The prize will be given for the most outstanding PhD thesis in the general area of the chemical sciences, as described in a 1000-word essay.

Call for nomination, deadline February 1, 2011, Prize USD 1000 and travel to the IUPAC Congress in San Juan, Puerto Rico, August 2011.

For more information, including application form, please visit the IUPAC web site at www.iupac.org/news/prize.html or contact the IUPAC Secretariat by e-mail at : secretariat@iupac.org or by fax: +1 919 485 8706.

Collaborative Agreement to Create a Reciprocal Lectureship between "The Italian Chemical Society" and "The Korean Chemical Society"

In order to further develop scientific links between Italy and Republic of Korea the Italian Chemical Society (SCI) and the Korean Chemical Society (KCS) hereby agree to create a reciprocal invitational lectureship.

The lectureship is named: "Italian Chemical Society and Korean Chemical Society. "Ree-Natta Lectureship". The following is mutually agreed upon.

Preamble

SCI and KCS, which are the members of the leading European and Asian Chemical Societies, respectively, are pursuing the development of bilateral cultural agreements with germane Chemical Societies.

This bilateral agreement is aimed at strengthening the scientific collaboration between chemists of the two countries. On the basis of the proposed agreement named "Ree-Natta Lectureship", SCI will invite every two years a distinguished chemist from Republic of Korea and arrange a series of lectures (usually three) for him/her to deliver at prestigious Italian Universities or Research Laboratories. Generally, the invited lecturer will be selected from a shortlist of two or three names received from the partner Korean Chemical Society.

Similarly, on every other alternate year, the Korean Chemical Society will select a lecturer from a shortlist (two or three names) received from SCI and invite him/her to give three lectures in three different Universities or Research Institutions.

The Italian Chemical Society will cover the travel costs of the Italian lecturer visiting Korea and will also take care of the local costs of the Korean scientist visiting Italy. In the same way, the Korean Chemical Society will support the travel costs of its representative visiting Italy and will cover the local costs of the Italian scientist during his/her lecture trip in Korea.

There will be no restriction for the area of chemistry to be considered for granting the bilateral lectureship award.

The agreement can be revoked by either society with at least one-year advance notice, becoming effective at the end of the succeeding year.

The two societies may consider giving the lecturer a parchment with the statement of the lectureship and a plate with the lec-

turer's name, the date and the place where it is given.

The two chemical societies agree to have the first event for "Ree-Natta Lectureship" in Korea for the Fall 2010.

Roma, July 6th, 2010

Targets in Heterocyclic Systems Vol. 13

È uscito il 13° volume della serie "Targets in Heterocyclic Systems. Chemistry and Properties", a cura di Orazio A. Attanasi e Domenico Spinelli.

Sono altresì disponibili i volumi 1-12 della serie.

Per informazioni:
Società Chimica Italiana
Viale Liegi, 48/c, 00198 Roma
Tel. 06 8549691
Fax 06 8548734
